ROLLER BLINDS

These contemporary, stylish and functional blinds
add a touch of class to every home.

Roller blinds are an extremely stylish window solution and are the height of fashion at the moment. They are one of the oldest types of blinds but have made a huge comeback with the modern fabrics that are now available.

At Santa Fe we have sourced a huge range of fabrics from a variety of suppliers to bring you the best selection of colours, textures, designs and prices. This allows you to make a decision based on both style and budget, without compromising the final look.

This range of fabrics allows you to choose whether your blind offers full privacy and blockout or partial privacy with various degrees of lightfiltering.

We can offer a variety of control systems from the standard chain through to full motorisation.

for your FREE in home design consultation.

SUNFILTER

Sunfilters have earned their popularity through making your indoors more environmentally friendly. While they effectively block a great deal of heat and UV, they do not completely block your view. At night with the light on, you will see in through a sunfilter blind.

Sunfilter blinds are incredibly durable and easy to clean. They don't collect dust and if anything gets spilt on them they can be wiped down with warm soapy water and a soft cloth.

SUNSCREEN & LIGHT FILTERS

This range of fabrics is in between a sunfilter and a blackout blind. They have a higher degree of light diffusion than a sunfilter fabric but will still allow light into the room which creates a lovely soft light tone. You cannot see out through these fabrics during the day and at night anyone outside would only see a slight shadow effect if you were close to the window.

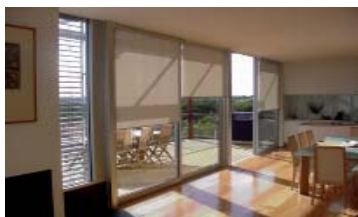

BLOCKOUT

Blockout blinds provide you with full privacy and will completely block the sun out. The majority of the blockout fabrics have a backing that will increase the thermal efficiency of the fabric. This white backing means that you can vary the colours of the blinds in different rooms to match your décor but have a uniform look on the outside.

INSTALLATION

When roller blinds are installed within your window jamb there will be gaps of between 15-25mm between the fabric and the jamb. Also, if the window is too wide for the fabric then where two blinds meet, there will be a 15 -20mm gap between the blinds.

ROLLER BLINDS

Waverley & Carribean are both unique textured sunfilter fabrics that have been chosen to give you a sunfilter roller with a difference. With the lovely texture and flecks of colours like Bamboo Whitewash, Marble Slate and Pewter, you will be assured that you are creating a design statement in your home.

Havana is a fine weave sunfilter fabric that will block 97% of UV to help keep the colours in your carpets and furnishings looking vibrant for years to come. There are 15 colours available.

Boulevard & Burbank are part of a designer range of blockout fabrics. Boulevard is heavily textured and several of the colours have toned light and dark flecks that give your blind a life of its own. Burbank fabrics have a lighter texture and a slight sheen to give them a classy look and feel.

Pembroke is our basic hardwearing blockout fabric. It is available in 15 fashion colours and is a great blind for the kitchens, bathroom and kids rooms.

Santa Fe Lightfilters are a stylish and very cost effective solution if you do not require full blackout at night and want light to filter into the room during the day. They are most commonly used in the living areas of your home. Our most popular colours are Vancouver Slate and Newberry Dove.

Double Roller blinds give you all of the options for light control that you may require. These are essentially two roller blinds installed in the same window. They will usually have a Sunfilter or Lightfilter fabric at the back and a Blockout fabric in the front. They are operated with separate chain systems.

QUALITY

We pride ourselves on the quality of all our products and our roller blind range is no different.

MOTORISATION

Motorisation is available on many of our roller blinds. In some of our ranges, we can offer battery operated motorisation. This allows you to install motorised roller blinds into any existing home without the hassle of having to arrange for wiring to be moved.
