

PERFECTSHEER™ BLINDS

Sleek and Elegant

ULTIMATE LIGHT CONTROL

PerfectSheer™ diffuses or redirects the natural light that enters your home. These blinds feature sheer fabric facings and gently curved vanes. We offer many different colours, so you can find something that will look amazing in your home.

The PerfectSheer blind is a double layered fabric blind that is available in light filtering and room darkening fabrics combined with an alternating elegant sheer panel that is woven into the fabric. The blind is operated by a continuous cord which is used for lowering and raising the blind, as well as positioning the fabric vanes for light and privacy control.

PerfectSheer makes it easy to match the fabric opacity suiting your needs. The room darkening opacity is sleek and elegant and creates an immediate calming effect. Light filtering opacity allows more light to come through while ensuring privacy while the shade is closed.

The PerfectSheer blind design is complemented by its stylish compact headrail with curved fascia in a range of colours and is suitable for inside and outside mount applications.

AVAILABLE IN MOTORISATION

Choose battery powered or AC adapter plug-in option. The PerfectSheer motorisation comes with a 15 channel remote and operates multiple shades individually or simultaneously.

FEATURES & BENEFITS

- Available in lightfilter and room darkening fabrics.
- Extensive range of colours and fabrics.
- Easily operated by a single cord.
- Ultimate control over light and privacy.

SMARTDRAPE™

Experience the Space

THE POETRY OF LIGHT

Soft like drapery and delicately architectural.

The SmartDrape undulating sheer and fabric vain construction is specially made to bring you style, versatility, and seamless indoor/outdoor living. Featuring unique construction with unimpeded walkthrough even while the shade is closed, along with the “Best for Kids” certified cordless operation, SmartDrape can infuse your space with a newfound level of enjoyment, privacy, light control and extra peace of mind. It is also an elegant solution for the biggest of windows, offering the appearance of a curtain and the control of a blind.

SmartDrape is constructed from a series of individual fabric vanes, offered in light filtering fabrics, suspended in sheer that comes in your choice of patterns, to create a floating effect. When closed, the shade easily transitions from completely solid to completely sheer - and everywhere in between. The SmartDrape innovative construction not only makes cleaning and ironing easy but also represents a significant value over having to purchase sheer and solid curtains to be hung separately. SmartDrape offers you both of the benefits without the bulk of two curtains.

FEATURES

- You can walk through even when the shade is fully open.
- Fabric Vanes are available individually - affordable to replace one at a time.
- 4 Fabric Textures, each available in 5 modern colours.
- 4 choices of headrail & wand finishes.
- Small stack to open up your area without penetrating your view.
- Minimal view of the components.
